# KINDERGARTEN NEWSLETTER

Grade level-KG2

With the guidance and support of KG-2 teachers, our little explorers finished their first unit **"HOW WE ORGANIZE OURSELVES"** successfully under the title **"Staying safe and organized"** with interesting and informative activities. The young learners acquired knowledge on 'Roles and Rules help people to cooperate, organize and stay safe' by building facts with understanding of safety rules, following rules at certain places and their responsibility in different places.

## HOW WE ORGANIZE OURSELVES

This theme is an inquiry into the interconnections of human-made systems and communities, the structure and function of organizations, societal decision making, economic activities and their impact on humankind and the environment.

During the process of inquiry, early learners observed certain **skills** of **Social and Communication**, also developed the **learner profile attributes Caring and Principled** in their personalities.

## CENTRAL IDEA

Roles and rules help people to cooperate, organize, and stay safe.

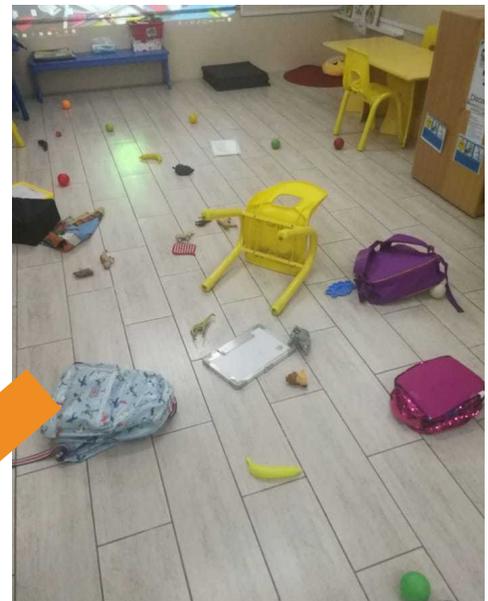

## WHAT WE LEARNED?

- \* Safety Rules
- \* Our responsibilities in different places
- \* Roles help us to co-operate

## MESSY CLASSROOM

The teachers unpacked the theme by surprising the early learners, by creating a messy classroom to know their reaction on the situation created. The reflection on the situation was noted by the teacher for further discussing with them.

Almost all of them were confused, but then later on it was seen that the young learners were organizing the classroom by cooperating and helping each other.

The talented creations were shown when the teacher asked them to draw about the messy class and the organized class.

The early learners then were instructed to play in the centers and were reminded of rules during the centers time.

## From school to Home!

With parents cooperation and support, the little helpers tried organizing themselves and helping each other at home.

## SORT THE CENTERS

An activity was planned and executed well for the children to sort out and organize.

The young explorers had fun sorting out the materials and organizing accordingly. Throughout the process they also developed learning attributes such as caring and principled in their personalities.

## INDOOR TRIP

Under the guidance of KG-2 teachers the early learners were taken for an indoor trip inside the school premises. The little learners curiously observed various places like the Nurse room, Nursery and the sports area. Then, they went back to their class and reflected the procedures and the responsibility of people. Also they learned how to be differently responsible in each place.

## FANTASY STATIONARY

Little explorers were taken for an outdoor trip, that was related to their unit of inquiry. They were exploring their self management skills, social skills and communication skills. It was seen that children gained knowledge in rules, helping people to cooperate, organizing and staying safe, by building facts with understanding of safety rules, following rules at certain places and their responsibility in different places.
